Updates github.com/dev-flowstate/SAT-Smart-Mistake-Sheet

Which file should I open?

Recommended on Windows

With buttons [SAT_Mistake_Log_v11.xlsm](#)

- A button appears inside each cell you click
- Paste screenshots with **Ctrl + V**, click a picture to zoom
- Needs a one-time unblock — **Part 1**

Mac, older Excel, or no macros

No macros [SAT_Mistake_Log_v11_NoMacros.xlsx](#)

- Same log, dropdowns, colours and dashboard
- No security warning, nothing to enable
- Pictures are added with Insert > Pictures

What is on the log

SAT Mistake Log (Digital SAT / Bluebook)

Click a cell and a button appears in it. No buttons? See the guide: unblock the file, then Enable Content.

Updates: github.com/dev-flowstate/SAT-Smart-Mistake-Sheet

Date	Section	Topic / Question Type	Bluebook Test	Module	Q	Mistake Type	What Was the Mistake?	Why It Happened (Root Cause)	How to Avoid Next Time	Priority	Status	Question Screenshot
1/15/2026	Math	Systems of Linear Equations	Test 4	Module 2	Q12	Used wrong strategy	Set up one equation backwards, solved for wrong variable	Rushed translating the word problem into equations without re-reading	Underline what the question actually asks before solving	High	Reviewing	
9/12/2026	Reading & Writing	Transitions	Test 5	Module 1	Q7	Misread the question	Picked 'However' but sentence 2 continues the idea	Skipped the second sentence	Read both sentences before looking at choices	High	Not Reviewed	
9/13/2026	Math	Percentages	Test 6	Module 2	Q14	Calculation error	Applied 25% and 10% to the original price	Added the discounts instead of chaining them	Apply each discount to the new price	Medium	Reviewing	
9/14/2026	Reading & Writing	Words in Context	Test 6	Module 1	Q3	icabulary / wording confusi	Chose 'meticulous' - sounded formal	Did not know 'tenuous'	Add unknown words to a flashcard deck	Low	Mastered	
9/15/2026	Math	Systems of Linear Equations	Test 7	Module 1	Q9	Used wrong strategy	Solved for x when the question asked for y	Did not re-read the question	Circle what the question asks	High	Reviewing	

1

2

3

4

5

1 Section and Topic — pick from lists; topics follow the section

2 Bluebook Test, Module, Q # — where the question came from

3 Mistake Type and notes — what went wrong, how to avoid it

4 Priority and Status — colour themselves red, yellow, green

5 Question Screenshot — a picture of the question, click to zoom

Quick start

1 Unblock once
Right-click the file > Properties > tick Unblock, then click **Enable Content** in Excel.

2 Log every miss
After each Bluebook test, one row per wrong question — with a screenshot of it.

3 Study the top offenders
Each week, redo the topics at the top of the Dashboard until they are Mastered.

In this guide

1 · Turn on the buttons

Unblock the file and enable macros — page 2

2 · Log a mistake

Pick values, Q #, notes and colours — page 3

3 · Question pictures

Add, zoom, replace, remove — page 4

4 · Study

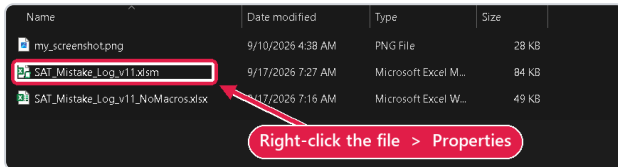

The Dashboard and fixing problems — page 5

Turn on the buttons

Windows marks files from email, WhatsApp or websites as untrusted, and Excel switches the buttons off. Clear the mark once and it stays cleared.

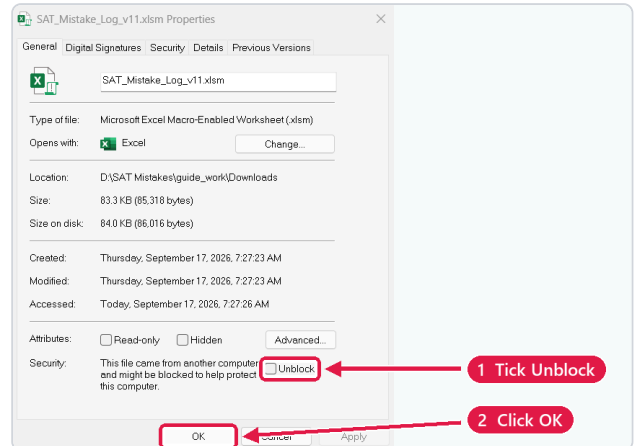

1 Open the file's Properties

Close Excel first. In your **Downloads** folder, right-click **SAT_Mistake_Log_v11.xlsm** and choose **Properties**.

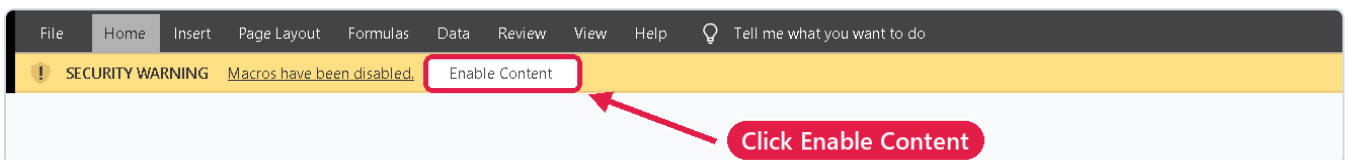

2 Tick Unblock, then OK

At the bottom of the **General** tab. No Unblock box? The file is already fine.

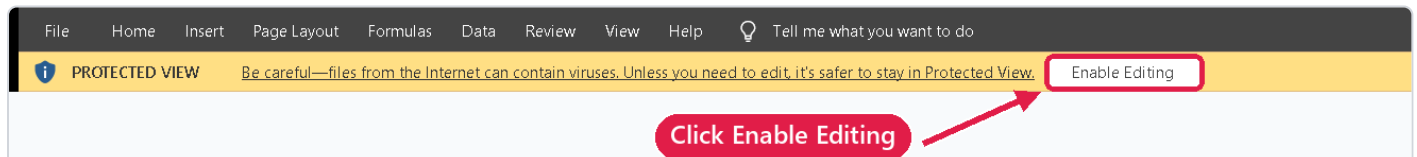

3 Open the file and click Enable Content

Double-click the file and click **Enable Content** on the yellow bar. Excel remembers this for the file.

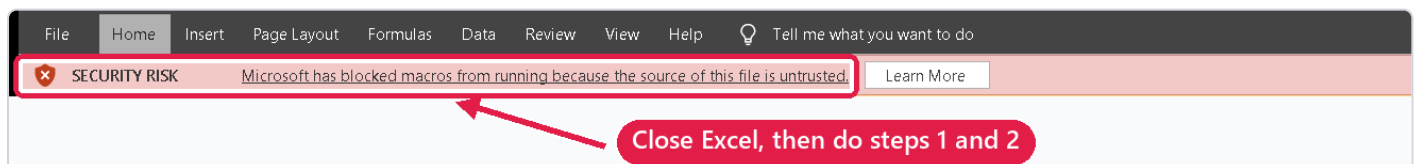

Seeing a different bar?

Yellow "PROTECTED VIEW" — Excel opened it read-only. Click **Enable Editing**.

Red "SECURITY RISK — blocked macros" — there is no button on this bar, which is normal. Step 2 was skipped: close Excel and do steps 1 and 2.

Is it safe?

Excel warns about **every** file with macros. These only move the buttons, show menus and place pictures — no internet, no other programs, no file access. The code is on GitHub.

Not on Windows?

Use **SAT_Mistake_Log_v11_NoMacros.xlsx**. Pick values with the arrow at the cell edge and add pictures with **Insert > Pictures**.

Not Google Sheets

Uploading to Google Sheets breaks the Section–Topic link. Use Excel on Windows or Mac.

Log a mistake

One row per question you got wrong. Almost every column is a list, so there is very little typing.

4 Click a cell, then Choose

Under **Section**, **Topic**, **Test**, **Module**, **Mistake Type**, **Priority** or **Status**, a dark **Choose ▼** button appears.

4	Date ▼	Section ▼	Topic / Question Type ▼	Bluebook Test ▼
8	9/14/2026	Reading & Writing	Words in Context	Test 6
9	9/15/2026	Math	Systems of Linear Equations	Test 7
10	9/16/2026	Choose ▼		
11				

Click the Choose button

5 Click an option

It goes into the cell. **(clear this cell)** at the bottom empties it.

4	Date ▼	Section ▼	Topic / Question Type ▼	Bluebook Test ▼
8	9/14/2026	Reading & Writing	Words in Context	Test 6
9	9/15/2026	Math	Systems of Linear Equations	Test 7
10	9/16/2026	Choose ▼		
11		Reading & Writing		
12		Math (clear this cell)		
13				

Click an option

6 Pick the Section first

The Topic list follows it: **Reading & Writing** shows its 11 skills, **Math** shows its 19.

If the Topic list is empty, that row has no Section yet.

4	Date ▼	Section ▼	Topic / Question Type ▼	Bluebook Test ▼	Module ▼	Q# ▼	Mis
9	9/15/2026	Math	Systems of Linear Equations		Module 1	Q9	Used
10	9/16/2026	Math	Choose ▼				
11							
12							
13							
14							
15							
16							
17							

Section is Math ...

... so only Math topics are listed

7 Q # — type only the number

Type **12**, not “Q12”. Fill in **Module** too: numbers restart in Module 2.

Bluebook Test ▼	Module ▼	Q# ▼	Mistake Type ▼
Test 6	Module 1	Q3	Vocabulary / wording confusion
Test 7	Module 1	Q9	Used wrong strategy
Test 8	Module 2	Q12	

Type 12 - it shows Q12

Just the number
Type only the digits,
e.g. 12. Excel shows it
as Q12.

8 Priority and Status colour themselves

High/Not Reviewed red, **Medium/Reviewing** yellow, **Low/Mastered** green.

Priority ▼	Status ▼
High	Reviewing
High	Not Reviewed
Medium	Reviewing
Low	Mastered
High	Reviewing
High	Not Reviewed

Colours fill in by themselves

Write useful notes

Mistake: what you did. **Why:** one level deeper. **Avoid:** an action — “circle what the question asks”, not “be careful”.

Find rows fast

The arrow on each blue heading is a **filter**. Before a test, filter Priority to **High** and Status to **Not Reviewed**.

What is locked

Type in rows 5–304. The title, headings, dashboard, instructions and lists are locked against accidents.

Add, zoom, replace or remove a picture

Seeing the original question again is what makes the review work. Each row holds one picture, saved inside the file.

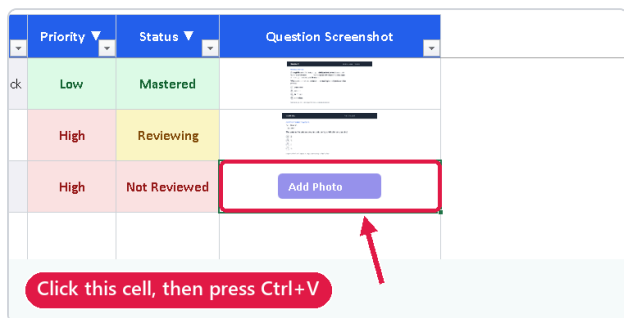

9 Copy a screenshot of the question

Press **Win** + **Shift** + **S** and drag a box around the question in Bluebook. It is copied, not saved.

10 Click the cell and press Ctrl + V

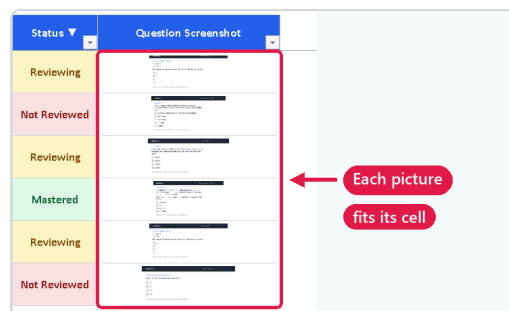

Click the row's **Question Screenshot** cell, press

Ctrl + **V** — or click **Add Photo** to pick a file.

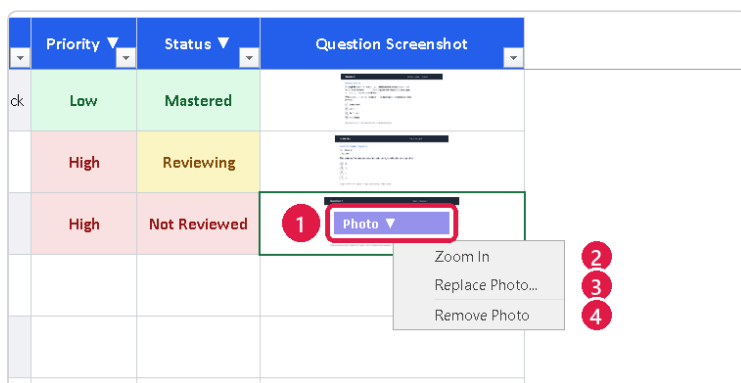

11 It shrinks to fit the cell

It moves with its row when you sort, and stays in the file if you email it.

12 Use the Photo menu

Click a screenshot cell that has a picture **1** — its button says **Photo ▼**. Click it:

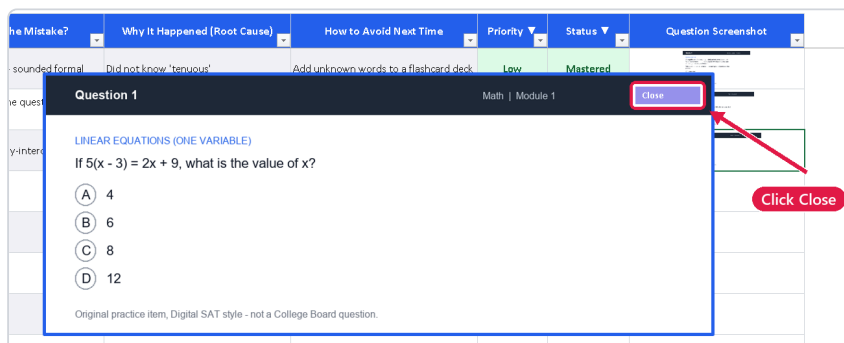

2 Zoom In — shows it large

3 Replace Photo... — pick another image

4 Remove Photo — deletes it

13 Put a zoomed picture back

Click **Close**, or click the big picture itself.

To...

Do this

Add a picture

Copy a screenshot, click the cell, **Ctrl** + **V** — or **Add Photo**

Zoom in

Click the picture — or **Photo ▼** > **Zoom In**

Replace it

Ctrl + **V** on the same cell again — or **Photo ▼** > **Replace Photo**

Remove it

Click the cell and press **Delete** — or **Photo ▼** > **Remove Photo**

Use the Dashboard to decide what to study

Mistake Log Dashboard

Made by Muhammad Salar Khan

Mistakes by Section

Section	Count
Reading & Writing	2
Math	3

Status Overview

Status	Count
Not Reviewed	1
Reviewing	3
Mastered	1

Total Mistakes Logged

5

Your Top Repeat Offenders (study these first)

Topic	Times Missed
Systems of Linear Equations	2
Percentages	1
Transitions	1
Words in Context	1

Study these topics first

Mistakes by Type

Mistake Type	Count
Careless / silly error	0
Misread the question	1
Didn't know the concept	0
Ran out of time	0
Used wrong strategy	2
Calculation error	1
Second-guessed correct answer	0
Vocabulary / wording confusion	1
Other	0

Priority Breakdown

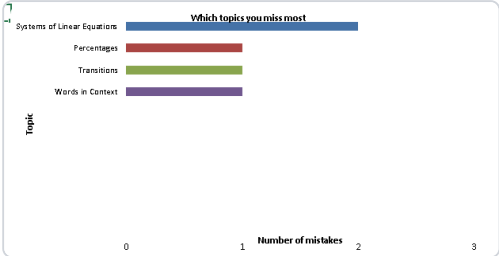

Priority	Count
High	3
Medium	1
Low	1

Mistakes by Bluebook Test

Test	Count
Test 4	1
Test 5	1
Test 6	2
Test 7	1
Test 8	0

Click the **Dashboard** tab at the bottom of Excel. It updates by itself as you log.

Your Top Repeat Offenders ranks the topics you miss most often. Work down that list, top first — that is where your points are.

Each bar counts logged mistakes. A longer bar is a weaker area.

A good weekly routine

Log straight after each practice test, then pick the top two Repeat Offenders, redo those questions from your screenshots, and set them to **Mastered** once you get them right twice.

If something is not working

What you see	What to do
No buttons appear in the cells	Macros are off. Follow Part 1, or use the NoMacros file.
Red "blocked macros" bar	Close Excel, right-click the file > Properties > tick Unblock > OK.
The Topic list is empty	Pick a Section in that row first.
A pasted picture stays big	Click any cell — it fits itself in. If it never does, macros are off.
"The cell is on a protected sheet"	That area is locked on purpose. Type in rows 5 to 304.
Using a Mac or Excel on the web	Use the NoMacros file.

Handy keys

Win + Shift + S	Copy a screenshot of the question	Ctrl + V	Paste it into the Question Screenshot cell
Delete	Remove the photo from that screenshot cell	Alt + ↓	Open a cell's list, or a heading's filter
Esc	Close a menu without choosing anything	Ctrl + S	Save your log
